Fire Rating: WUI Approvals

Applications

Select Knotty Western Red Cedar is most commonly used for exterior siding, soffits & fencing as well as interior paneling, beams & ceilings. The Select Knotty grade creates a more rustic appearance with expectation of tight knots in each board.

Maintenance & Resistance

Western Red Cedar has been used for decades as an exterior building material. It has natural durability & can be left to weather over time to a silver patina. If the goal is to maintain color, refinishing on a regular basis is required and is dependant on recommendations from the coating manufactured selected on your project.
